

Ven Swaminathan is always running at full capacity. Every day is a new challenge. Every challenge is a new opportunity.

And his motto is "near zero downtime."

Ven was the first engineer from his village in India.

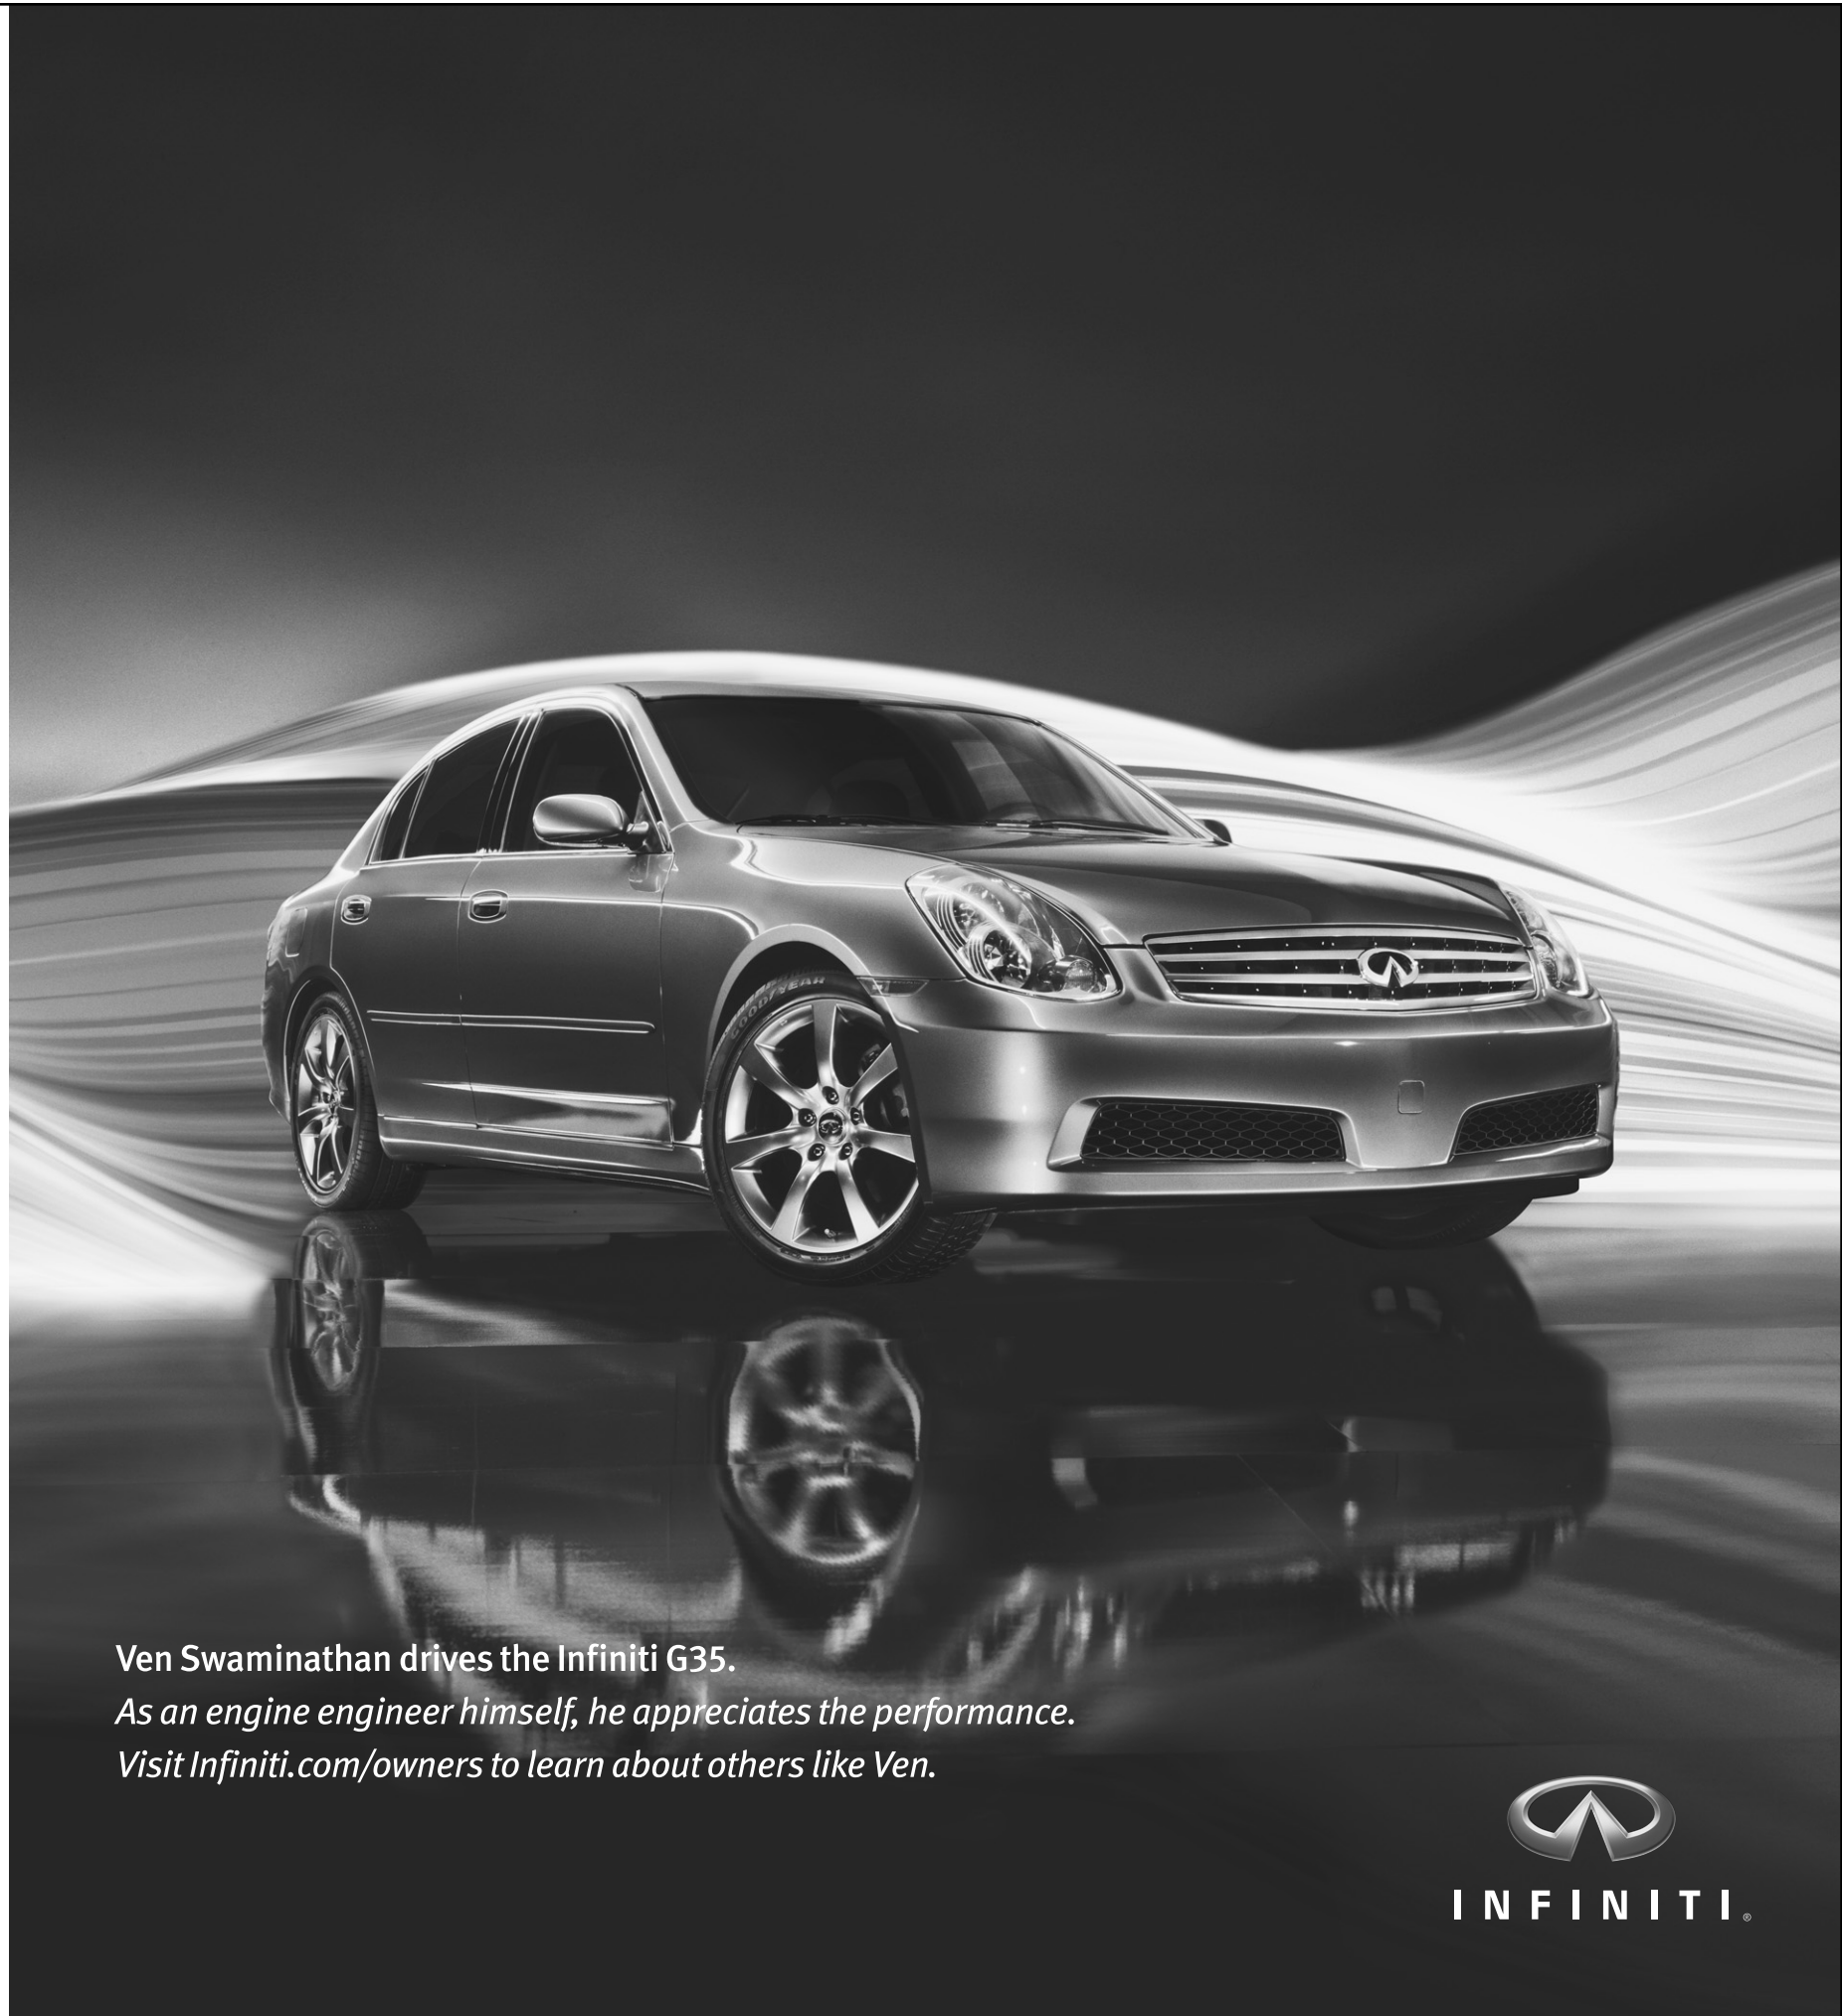

When he eventually came to the States,

Ven Swaminathan

he started his own company: CNC (Computer Numeric Control) Onestop Inc – an engineering consultancy specializing in automotive and aircraft engine manufacturing. With his knowledge, attitude and work ethic, Ven's client base grew so quickly, he figured the only way he could serve all of them would be to clone himself a million times over. So that's what he did. Sort of. He developed drmmachines.com, a Web site where he and other engineers could clone their expertise into a knowledge base, so they could share, utilize and transfer information. Anywhere. Anytime. So far, it's been a great business decision. The Web site is now the number one search engine for numeric control troubleshooting. And more importantly, it allows Ven to be, quite literally, in a million places at once.

Always wear your seat belt, and please don't drink and drive. INFINITI, and INFINITI model names are Nissan trademarks. © 2006 INFINITI Division of Nissan North America, Inc.

Ven Swaminathan drives the Infiniti G35.
As an engine engineer himself, he appreciates the performance.
